

APPENDIX A

GUIDELINES - INTRODUCTION

There are a few things I need to mention to help keep the questionnaire standardized for all participants:

- The questionnaire is anonymous; please do not write your name.
- The questions are estimated to take approximately 10-15 minutes to complete; but please take your time.
- Treat this questionnaire as you would a test. Please, no discussing your answers.
- Please take the questions seriously, and be mindful of others who have not yet finished.

Most importantly, all scenarios must be taken at face value. This means that no further description or explanation can be given.

I will gladly take all questions once everyone has finished.
